

Addition— with numbers up to 3 digits

Addition with no regrouping

$$346 + 233 = 579$$

Remember to;

- Write one digit per square.
- Write each digit in the correct place (H, T, O)
- Add the ones first.
- Repeat with the next column from the right until all digits have been added.

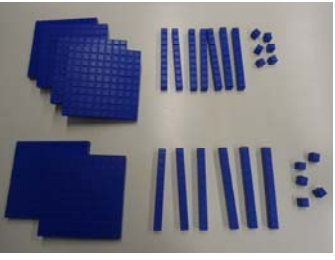

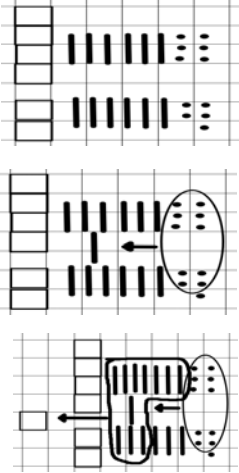

Concrete	Pictorial	Abstract												
		<table border="1" style="border-collapse: collapse; margin: auto;"> <tr><td></td><td>3</td><td>4</td><td>6</td></tr> <tr><td>+</td><td>2</td><td>3</td><td>3</td></tr> <tr><td></td><td style="border-top: 1px solid black;">5</td><td style="border-top: 1px solid black;">7</td><td style="border-top: 1px solid black;">9</td></tr> </table>		3	4	6	+	2	3	3		5	7	9
	3	4	6											
+	2	3	3											
	5	7	9											

Addition with regrouping

$$476 + 265 = 741$$

Remember to;

- Write one digit per square.
- Write each digit in the correct place (H, T, O)
- Add the ones first.
- Regroup any tens if the answer is over 9 e.g $6 + 5 = 11$ so regroup the 1 (ten)
- Write the regrouped digit below the answer lines in the next place value column
- Add the tens.
- Add all of the digits in that column including any tens regrouped from the ones
- Repeat until you get to the furthest column left and have added all digits.
